

F28PL1 Programming Languages

Laboratory 3

- A) write a C program which counts the number of characters in a file, from a command line argument.

```
$ count path  
- displays number of characters from path
```

- B) modify `copy.c` to append an arbitrary number of files into a single file, from command line arguments:

```
$ append source1 ... sourceN destination  
- copies source1 ... sourceN into destination
```
